# THE COMPANY

PolyTapes GmbH, based in Wickede/Ruhr, North Rhine-Westphalia, is a surface protection film manufacturer and has been manufacturing premium-quality surface protection films for a wide range of applications for several decades. What makes PolyTapes special is our depth of production and the resulting flexibility. Our own product development, production and quality control represent a continuous chain that guarantees the best possible solutions. Ongoing investments safeguard the proverbial PolyTapes quality – now and in the future.

The good reputation of **»Made in Germany«** is important to us and we strive to contribute to it.

We supply high-quality protection films customised for your special applications.

Worldwide leading manufacturers from various fields already trust in PolyTapes' surface protection films:

- ✓ Window industry
- ✓ Construction industry
- ✓ Plastics industry
- ✓ Aluminium and steel industry
- ✓ Wood and furniture industry

**You can expect a lot of us.**

# THE PRODUCT

PolyTapes develops perfect and customised solutions for your application and processing requirements. The combination of materials is what makes the difference.

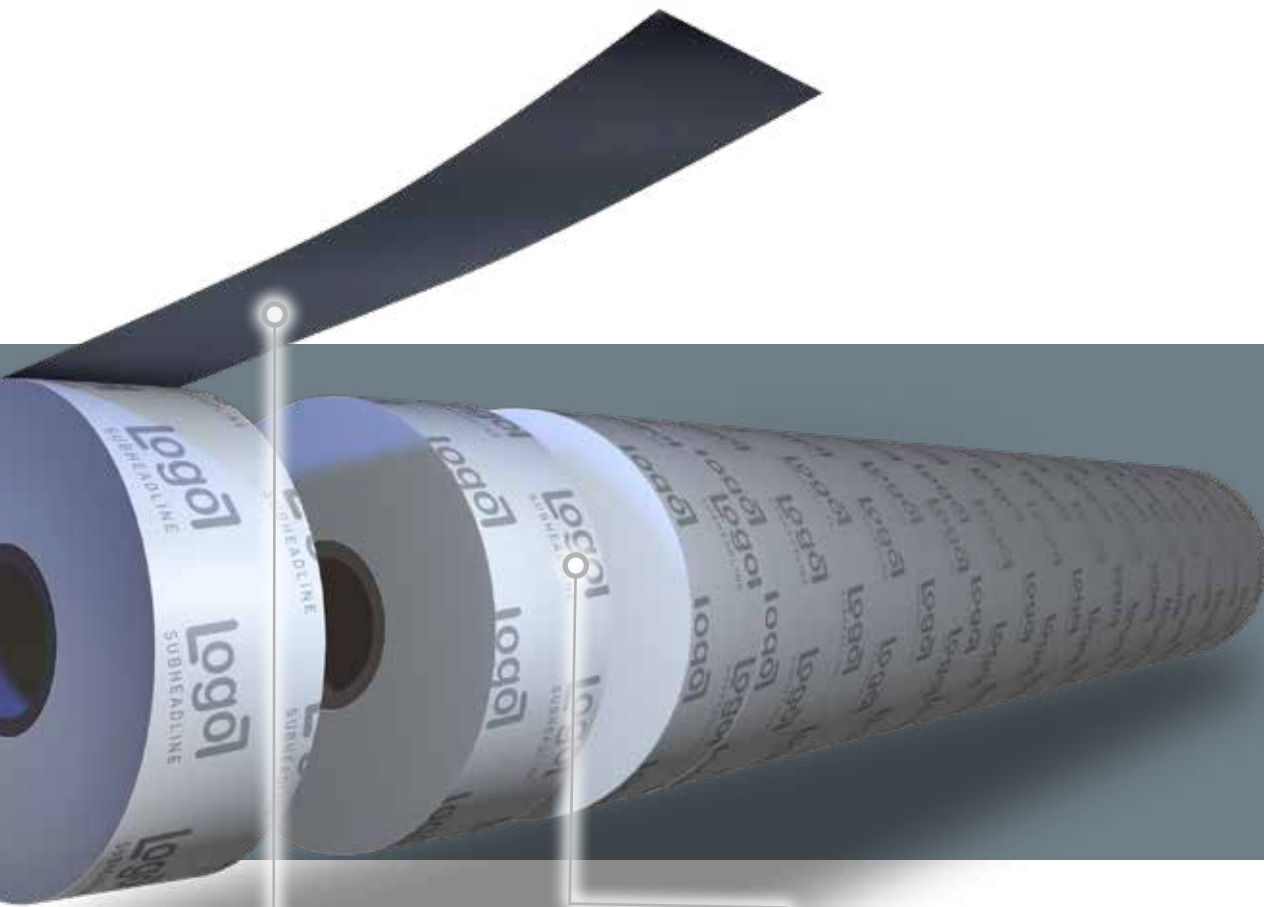

This is an overview of some of our services:

- ✓ High-quality multilayer film extrusion
- ✓ In-house adhesive production
- ✓ Latest coating procedures
- ✓ Individualisation by means of a 6-colour printing machine with a printing width of up to 1,600 mm
- ✓ Precision wrapping and cutting devices
- ✓ In-house quality management

We manufacture premium-quality surface protection films for a wide range of applications. PolyTapes films increase productivity and contribute to cost-efficiency.

They can be applied both mechanically and manually and, most importantly, removed without leaving any residue.

## *The adhesive*

The chemical and physical adhesive properties optimally match the materials to be protected.

Such as:

- **PVC**
- **Plastics**
- **Stainless steel and steel**
- **Aluminium**
- **Painted surfaces**
- **Glass**

## *The printing*

Customised printing opens almost unlimited possibilities. When selecting the material, we can match the colour to your corporate design. Many printing options are feasible:

- **Company logo**
- **Print instructions**
- **Processing instructions**
- **Contact information**

## *THE QUALITY*

PolyTapes stands out due to its own product development, production and quality control. This guarantees the best possible solutions.

The in-house technical centre has the capability to immediately attend to special customer enquiries. Thanks to various measuring and analysis equipment such as the IR spectrometer, weathering device, m-DSC, DMA, TGA, viscometer and a universal testing machine, we are not only able to continuously monitor production, but also to effectively check and adapt to developments and customer requirements. If necessary, we also cooperate with well-known German institutes.

PolyTapes is certified according to DIN EN ISO 9001

Sustainable and environmentally-friendly production is not only a requirement but also our philosophy. This is why in our production process we constantly pay attention to:

- **Solvent recovery**
- **Avoidance of pollutant emissions**
- **Recyclable polyethylene films**
